

Ray Wind Farm Fund

Ray Wind Farm began producing electricity in 2017.

The Ray Wind Farm Fund, was set up as a Community Interest Company and is managed by a board of local directors.

The fund has helped revitalise village assets and supported local businesses and groups to build resilience in the face of a changing world. The fund's main priorities are improving facilities and connectivity between rural communities amongst others.

To date it has supported projects such as
Wildlife and environmental enhancement projects,
Business support and start ups
Sports groups and local events
Charities and services for those with limited mobility
After school activities and support for the local agricultural community.
